GLOBAL HOOFPRINT
Adding to months-long national and international media coverage of UC Davis’ study on feeding seaweed to cows to reduce methane emissions, MIT Technology Review ran a new story on Nov. 23.

TOOTH FINDING
A cross-disciplinary team led by UC Davis researchers discovered a new way to estimate the biological sex of human skeletal remains based on protein traces from teeth. The discovery will aid archaeologists in understanding ancient societies and peoples. Dentistry Today

FOCUSED ON DIVERSITY
UC Davis launched a groundbreaking effort to improve faculty diversity through eight open recruitment searches. Vice Provost for Academic Affairs Phillip H. Kass and Roland Faller, professor of chemical engineering, were quoted in an Inside Higher Ed piece about the program, and the MBA Blog Online picked up the story.

Amazing Images
UC Davis released the first scans from EXPLORER, the world’s first medical imaging scanner that can capture a 3D picture of the entire human body at once. The scanner was developed by UC Davis scientists Simon Cherry and Ramsey Badawi in partnership with Shanghai-based United Imaging Healthcare. The story was picked up by more than 300 outlets including Popular Science.
Go-getters, change makers, problem solvers

Opened in 1908, UC Davis is the most academically comprehensive university on the West Coast. We’re known for working across disciplines to solve the world’s most pressing problems and for our commitment to artistic and cultural expression.

What drives us

We empower a dynamic educational experience. We discover and innovate. We foster a diverse and inclusive community. We advance the condition of health. We nourish and feed the world. We protect and sustain the environment. We champion curiosity. We rank among the world’s best.
